Bee Sweet Citrus Launches Digital Check-In System for Drivers

FOWLER, Calif., - Bee Sweet Citrus' shipping department has launched an online check-in platform for drivers picking up fruit at their facility. This custom digital portal enables seamless two-way communication between drivers and shipping clerks, ensuring a hassle-free pickup experience.

"Our new, custom-built shipping portal offers an easy and effective way for drivers to check in for their pick-ups prior to arrival," stated Bee Sweet Citrus Shipping Manager Salvador Rivera. "By using our portal, drivers minimize unnecessary wait times at our facility, and the system is conveniently accessible on both desktop and mobile devices."

Before the portal, all drivers checked in at Bee Sweet Citrus' shipping office using paper forms to provide shipment, driver, and product details. These forms required manual verification by the company's shipping clerks, making the process time-consuming—especially if errors occurred.

Each day, up to 150 carriers move through Bee Sweet's shipping department. With 24 available docks and cross-docking capabilities, maintaining an efficient check-in process is essential for drivers, customers, and Bee Sweet Citrus' shipping team.

"After a driver checks into our portal, a clerk can digitally confirm their information and assign a pick-up time," Rivera continued. "An authorization code is then sent to the driver to enter the facility, followed by further instruction regarding their shipment."

The portal also allows drivers to select their preferred language for all communications, further supporting Bee Sweet's commitment to a smooth check-in process.

To access the portal, drivers should visit www.shipping.beesweetcitrus.com. For questions, call Bee Sweet's shipping department at 559-834-4214.

###
